

SHARPER PEAKS BETTER SEPARATIONS

HYDROGEN AS CARRIER GAS FOR GC / GC-MSD

Helium shortages are becoming commonplace, hydrogen will be an excellent alternative to helium.

Overcome the challenges of using hydrogen as a carrier gas, we as JSB can deliver you the complete package for changing your GC- Lab.

- We all know the safety questions around hydrogen. JSB offers a hydrogen sensor kit for the GC, so safety first.
- For the gas supply you can choose cylinders, but we offer a wide range of hydrogen generators, which is safer than cylinders. For every customer we have the perfect fit.
- The new Hydrolnert source minimize loss in sensitivity and spectral anomalies associated with hydrogen gas.
